Dear Customer(s)

### **Globally Harmonized System of Classification and Labeling (GHS) Notification**

As you may be aware, a regulatory requirement has been implemented in the United States (29 CFR 1910.1200) requiring a change to the way hazards are communicated on a Safety Data Sheet (SDS) and product label. This notification serves as an effort to provide communication and clarity to our ongoing process of converting our Material Safety Data Sheets (MSDSs) and product labels over to the GHS format for Safety Data Sheets and product labels.

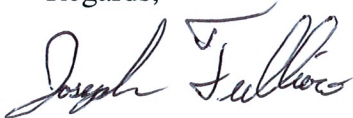

We have developed our conversion timelines and will be moving forward diligently to meet them. Due to the complexity of such a conversion, we cannot adjust our timelines and can only make the following assurance:

Our products will meet the requirements of GHS by the compliance deadline of June 1, 2015.

We understand this may be an inconvenience, but please be aware that we are taking the additional time to ensure we are delivering a safe product with accurate information pertaining to any relevant hazards.

We thank you for your patience and understanding and look forward to our continued business partnerships in the future.

Regards,

Joseph Fulliero  
EH&S Manager
